

Cyber Risk *Advisory* for Growing Organizations

Acrisure Cyber Services, LLC (ACS) delivers trusted cybersecurity strategy, risk management, and advisory services. We can help you cut through the complexity of cyber risk - giving you a clearer picture of potential exposures, what to prioritize, and ways to help protect what you've built.

Right-Sized

&

Right-Fit Approach

The Reality

Many organizations may lack dedicated resources or the specialized expertise needed to develop a cyber risk management program and may not know where to start. Hiring a CISO and full cyber-security team can be costly.

Our Approach

We bring CISO-level cybersecurity insight without the expense of hiring a full internal security team, helping with right-sized strategies aligned to your organization's needs and budget.

How We Can *Help*

Risk Visibility

Gain a clearer understanding of your cybersecurity posture, vulnerabilities, and third-party risk exposure - explained in practical, actionable terms.

Governance & Compliance

Support compliance efforts and navigate regulatory requirements including HIPAA, PCI DSS, GDPR, CMMC, SEC, SOC 2, and more.

Incident Preparedness

Develop cyber response plans, policies and playbooks, and business continuity strategies - so your organization can respond to and recover from cyber incidents more effectively.

Culture of Security

Build a top-down culture of cybersecurity through leadership engagement, tailored awareness training, and accountability across your organization.

Our Advisory Services

Governance, Risk & Compliance Advisory Support

Whether your organization needs help meeting cyber compliance requirements, strengthening its security posture for an insurance application, or gaining cybersecurity leadership – we can tailor our support to your organization's needs

What's Included

- Cyber risk assessments and exposure analysis
- Compliance roadmaps
- Plan, policy and procedure development
- Incident response planning and business continuity
- Virtual CISO - senior advisory on a flexible basis
- Cyber risk quantification analysis and strengthening practices that may be evaluated during the cyber insurance underwriting process.

Tailored Cybersecurity Training & Organizational Transformation

Your employees are your first line of defense. We deliver hands-on training that helps your team to identify cyber threats, reduce costly mistakes, and develop lasting security habits.

What's Included

- Half-day and full-day workshop options
- Custom content tailored to your operations
- Phishing simulations and hands-on exercises
- Red-team scenarios with group problem-solving
- Separate tracks for staff, managers, and executives
- Completion certificates for all participants

Why Work with Us?

✓ Outcomes Over Controls

Cyber risk translated – cutting through the technical jargon to focus on what matters to your bottom line.

✓ Built for Growing Businesses

Enterprise-grade expertise with right-sized solutions for your organization's stage and budget.

✓ We Build Capability, Not Dependency

Our goal is to empower your team to confidently manage cyber risk - not an ongoing consulting dependency.

✓ End-to-End Resilience

Uniquely positioned to integrate cybersecurity and managed IT into a unified strategy.

✓ Cross-Industry Expertise

Our team has provided solutions across diverse sectors including healthcare, finance, manufacturing, and more.

✓ Proven Track Record

Award-winning team with expertise supporting best practices and industry standards.
